

STARLET ARCHITECTURAL LIGHTING

TOPOPOLIS | 5 IN | MATTE BLACK

STRLT-RP1-BK-C32-05

PRODUCT IDENTITY

|                   |                                                                                                   |
|-------------------|---------------------------------------------------------------------------------------------------|
| PRODUCT TYPE      | Architectural Trim                                                                                |
| PLATFORM / FAMILY | RP1 / TOPOPOLIS                                                                                   |
| NOMINAL SIZE      | 5 in                                                                                              |
| FINISH            | Matte Black                                                                                       |
| DESCRIPTION       | Decorative TOPOPOLIS cylinder trim for the RP1 5-inch light engine. Light engine sold separately. |

CONFIGURATION AND COMPATIBILITY

|               |                                                                              |
|---------------|------------------------------------------------------------------------------|
| STYLE         | C32 / TOPOPOLIS                                                              |
| COMPATIBILITY | Compatible with STARLET RP1 5 in light engine; light engine sold separately. |
| LIGHT ENGINE  | Sold separately; select the compatible STARLET light engine for the project. |

LIGHTING PERFORMANCE

|            |                                                                                                                                                |
|------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| PHOTOMETRY | Photometric performance is associated with the selected compatible STARLET light engine. Use Technical Resources to select the engine and CCT. |
|------------|------------------------------------------------------------------------------------------------------------------------------------------------|

DOCUMENTS AND PROJECT RESOURCES

|               |                                                                                                                                 |
|---------------|---------------------------------------------------------------------------------------------------------------------------------|
| SPECIFICATION | Current STARLET specification sheet. Product identity is based on Catalog Revision A4.1.                                        |
| INSTALLATION  | C28 / C32 Installation                                                                                                          |
| LISTING       | Use model-qualified listing information for the selected compatible light engine; no blanket accessory listing is claimed here. |

PROJECT USE

|                    |                                                                                                                                          |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| SPECIFICATION NOTE | Select the compatible STARLET light engine first, then use that engine's CCT-specific photometry for fixture schedules and calculations. |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------|
